

Home Insurance

As in the UK it is just as important to make sure your property here in Turkey is fully insured. We are currently working with an established local insurance company who will provide a fully comprehensive policy for contents to protect against accidental damage, fire or theft whether there is a problem while you are in the property or if you are renting. They can even provide you with an English copy of the policy.

When you only spend a few weeks a year here it is well worth the peace of mind knowing that you have adequate cover for your holiday home.

Earthquake Insurance

In Turkey it is a legal requirement that all properties have earthquake insurance, known here as Dask insurance. It's not expensive and the price is based on the size of the property.
