

New Build Project Management

If you have recently purchased an off plan property in the Fethiye area and have concerns about the quality of the build why not let us keep an eye on things for you.

We have experienced staff who can make the process a lot more stress free. We could visit the build on a regular basis and report back to you providing detailed reports and photographs so you can follow the progress.

With a busy workschedule in the Uk it is not always possible to jump on a plane and do it yourself but as an independant observer we can give you an honest opinion and some peace of mind on how the build is progressing.

It is just as important that when the property has been finished that someone inspects it thoroughly to ensure that the finish is perfect, that the fixtures and fittings are up to standard and any special requirements have been met.

If you are interested in this or any similar service please contact us for more information at
